PASSAGE 1

Great books do not spring from something accidental in the great men who write them. They are the effluence of their very core, the expression of the life itself of the authors. And literature cannot be said to have served its true purpose until it has been translated into the actual life of him who reads. It is the vast reservoir of true ideas and emotions. In a world deprived of literature, the broad, the noble, the generous would tend to disappear and life would be correspondingly degraded, because the wrong idea and the petty emotion would never feel the upward pull of the ideas and emotions of genius.
